Operator Verification Brief

Betway in Great Britain, Spain and Portugal

What does the retained Atlas evidence support for Betway in Great Britain, Spain and Portugal?

Prepared 2026-11-05 | Retained checks: 2026-08-26 to 2026-10-24

This public format sample reuses existing Atlas evidence. Preparing it on 5 November 2026 does not recheck a licence, renew a domain match or establish current commercial availability. It is not commissioned client work.

Decision summary

Jurisdiction	Retained finding	Status checked
Great Britain	Positive licence evidence	2026-09-11
Spain	Positive licence evidence	2026-10-24
Portugal	Licence revoked	2026-10-24

What this sample establishes

Two selected records retain positive licensing evidence on their own check dates. Portugal records revocation at the operator's request. These are three separate jurisdictional findings, not a global access list.

What needs a fresh check

Reopen the official sources before relying on today's status. Confirm the legal entity, domain, exact product and permission term separately. No date was renewed merely to produce these files.

The matching CSV contains five claim-to-source rows. Identity rows keep their older check dates instead of inheriting a later status check.

Defined service scope

The EUR 195 founding brief covers one operator in up to three named jurisdictions, PDF + CSV and one clarification round. Delivery is 3-5 business days after scope confirmation. The written scope sets fresh checks, cut-off and exclusions.
